360° of Reliability

Programmable custom output curve and switches

Digital or analog output

Speed: 3,000 RPM

Resolution: 0.09°

Repeatability: 0.05%

Accuracy: 0.35°

Operating temperature: -40°C to +85°C

Novotechnik's **RSC3700** series of non-contacting sensors incorporate a microprocessor to provide up to 360° absolute angle measurements with 12-bit resolution. Designed to operate under adverse conditions, the **RSC3700** series has a stainless steel housing sealed to IP 67 to protect against shock, vibration, humidity, dampness, oil, and dust. Plus it's protected against over-voltage and short circuits.

Electronics packaging for exceptionally high EMI/RFI attenuation

When your specs call for exceptionally high EMI/RFI attenuation and resistance to earthquakes, our shielded enclosures will meet the requirements.

- 80 Db attenuation at 1 GHz
- 60 Db attenuation at 10 GHz
- Shielded i/o access and air filtering
- Seismic resistance tested to NEBS TR 63 for Zone 4
- Shock and vibration requirements, including Mil-Spec 810 and 901, FCC/VDE, EMP/TEM PEST and others

For more information, call us: 800-204-7225
fax: 630-987-5314

COOL TOOL

It's yours free

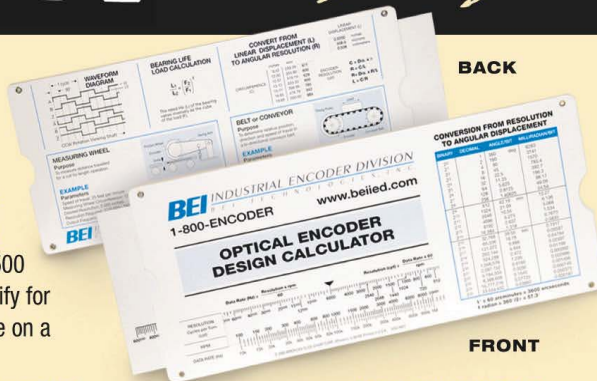

Encoder Design Rules at Your Fingertips...

Do you need to know if your controller has the bandwidth to handle the data rate of a 5000 cycle-per-turn encoder rotating at 2500 RPM... or what resolution you should specify for your encoder to achieve a 0.010" tolerance on a cut-to-length operation?

You'll have the answers to these and other critical questions right in the palm of your hand with the new Optical Encoder Design Calculator from BEI, the leading name in encoders.

1-800-ENCODER **www.beiied.com**

BEI INDUSTRIAL ENCODER DIVISION
BEI TECHNOLOGIES, INC.

Call 1-800-ENCODER (1-800-362-6337) and ask for your free Design Calculator, visit www.beiied.com/calc.html and enter code 1701, or fill out and return this card.
